

Professional Summary

Creative technologist and independent game developer with a decade of professional office management and data analysis experience. Skilled in C#, Python, Unity ECS/DOTS, and AI-assisted development workflows. Experienced building software systems, hardware prototypes, and community-facing content. Holds AI competency certifications from Anthropic and Oracle. Seeking a role that bridges technical problem-solving with creative or operational impact.

Experience

Independent Game Developer & Technical Content Creator | Self-Employed / Mark Edward Aldrich Jr 2022 – Present

- Develops original game titles in Unity using ECS/DOTS architecture and Netcode for Entities, with all programming in C#.
- Built AI-assisted development pipelines using Claude Code, local LLM orchestration via Ollama, and Model Context Protocol (MCP) tooling.
- Prototyped hardware projects using Arduino, including a robotic camera system with automated movement and livestreaming capability.
- Produces technical video content (YouTube Shorts, Twitch) documenting game development and engineering workflows.
- Maintains structured project documentation and knowledge management systems using Obsidian with custom organizational frameworks.

Volunteer Event Organizer & Photographer | Boston Game Dev (501(c)(3) Nonprofit) 2022 – Present

- Organizes and photographs community events for a nonprofit serving the greater Boston game development community.
- Coordinates logistics, manages communication with attendees and venues, and delivers event photography for organizational use.

Office Manager | Autocraft Collision May 2012 – 2022

- Managed day-to-day office operations including invoicing, supply requisition, vendor relations, and client dispute resolution.
- Handled all accounting inquiries and insurance coordination across a multi-person team over a decade of tenure.
- Built and maintained internal workflow systems and operational procedures supporting consistent business operations.

Sales Analyst | March Second Inc. Oct 2014 – Apr 2015

- Prepared sales forecasts and analyzed performance data to evaluate progress against client sales goals.
- Developed sales quotas using Excel-based data modeling, pivot analysis, and reporting for the client sales team.

Education

Bachelor of Business Administration
Salem State University · May 2015

Certifications

AI Fluency: Anthropic (via Skilljar)
AI Foundations: Oracle

Technical Skills

Languages: C#, Python, Kotlin, C++, SQL, Arduino
Game Dev: Unity ECS/DOTS, Netcode for Entities
Tools & Tech: Git, Obsidian, Ollama (local LLM), MCP tooling, Claude Code, OBS
Productivity: Excel (advanced), Pivot Tables, data analysis
Soft Skills: Self-directed learner, project management, technical writing, community organizing
